

WEARTEX® RUBBER SHEETS

Taurus's Wearthex® Rubber Sheets are a natural high quality, long lasting 40 Shore A used for abrasion impact and corrosion resistance. It is an all-round wear protective sheeting that can be made to fit most applications from light to heavy duty.

Wearthex® rubber is an exceptionally versatile and appropriate as a protective lining for a number of surfaces to reduce abrasion and corrosion of the base structure.

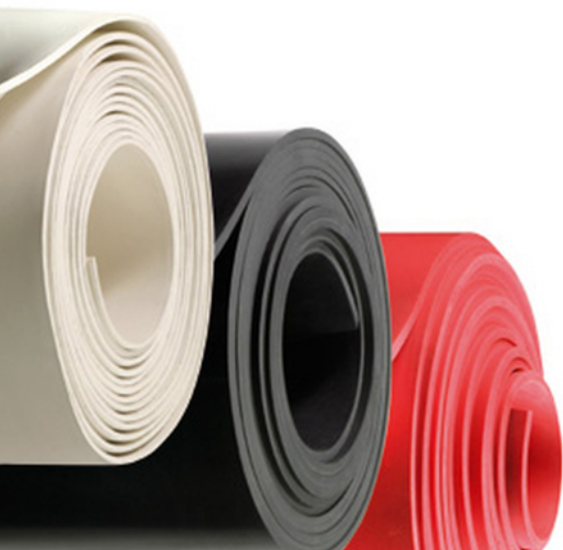

Wearthex® Rubber is commonly used in the following lining applications:

- Pipe Lining
- Chute Lining
- Hose Construction
- Vessel Lining

Wear characteristics are at their best pure from the tree. The more work that is put into blending the rubber, the more these characteristics are obliterated by the shearing and the breaking up of the long molecular chains.

Our continued performance advance in the rubber industry lies in our proven track record of the manufacturing process, which creates a product that provides exceptional performance when compared to other abrasion materials.

PHYSICAL PROPERTIES

Wearthex® Rubber 40

| | |
|---|-------------------------------|
| Polymer Type | Natural Rubber |
| Hardness (IRHD) | 40 Shore |
| Modulus @ 500% (MPa) | 2.0 |
| Tensile Strength (MPa) | 25 (3618 psi) |
| Elongation at Break (%) | 830% |
| Tear Strength (N/mm) | 44 (250 lbf/in) |
| Specific Gravity | 0.96 |
| Resilience (%) | 830% |
| Operating Temperatures (continuous use) | -40°C to +70°C/40°F to +158°F |
