

## FABRIC REPAIR PATCHES

Fusion Fabric Repair Patches offer a balance between an economical and durable repair for puncture or gouge damage, as well as longitudinal rips. These repairs won't damage the conveyor belt and will allow the belt to be back in service in a matter of hours. The repair may very well last as long as the original belt remains in service. Fabric reinforcement provides longer-term security over standard patches.

### FEATURES:

- Economical
- Won't damage the conveyor belt like some mechanical fasteners
- Durable, may last as long as the original belt
- Available in various sizes and width
- Bonding layer offers excellent adhesion

| PRODUCT CODE                    | Size<br>in | Weight |    | Quantity<br>Per Box |
|---------------------------------|------------|--------|----|---------------------|
|                                 |            | lbs    | kg |                     |
| <b>Reinforced Diamond Patch</b> |            |        |    |                     |
| CP-DPF-65                       | 6 x 5      | .5     | .2 | 5                   |
| CP-DPF-108                      | 10 x 8     | .7     | .3 | 5                   |
| CP-DPF-1410                     | 14 x 10    | 1      | .5 | 5                   |
